EXPERIENCE

Software Engineer Intern | CIBC

Jan – Apr 2026 | *Toronto, ON*

- Accelerated full deployment pipeline from **5h to 30min** process, automating CI/CD workflows across **4 environments** with GitHub Actions, Docker, and Kubernetes
- Cut recurring deployment validation time by **92%**, automating release and security checks with Linux scripting
- Architected **EDIx DevOps infrastructure** across **4 environments**, provisioning ARO, PostgreSQL, SSO, SPN authentication, and DNS for production deployment

Software Engineer Intern | CI Technologies

May – Aug 2025 | *Vancouver, BC*

- Cut template setup time from **2h to 10min**, independently shipping a marketplace platform across **4 enterprise applications** in 2 months
- Unified **5 heterogeneous template schemas** into a reusable data model, enabling cross-application sharing and reducing maintenance overhead
- Reduced dashboard load time by **65%** by replacing **10K+ record queries** with 50-record pagination and caching
- Mentored **2 developers** in debugging, Git, and system design, codifying workflows into **reusable onboarding guides** for future co-ops

Full Stack Developer Intern | InvestMint

Sep 2024 – Apr 2025 | *Toronto, ON*

- Expedited client onboarding from **3 days to 5min**, replacing CEO-mediated emails and manual Python execution with a **self-service workflow**
- Integrated InvestMint's **Python ETF recommendation engine** into a real-time portfolio dashboard for **\$10K+ investment decisions**
- Built a **cash liquidity calculator** that transformed imported Excel cash-flow data into real-time asset, liability, and liquidity analysis

PROJECTS

WatGuessr.io | *Vue.js, AWS S3, Node.js, Java, Spring Boot, PostgreSQL, WebSockets*

- Architected a **real-time multiplayer platform** with **Spring Boot/WebSockets**, supporting **750+ users** across 3 game modes (singleplayer/multiplayer/ranked)
- Cut round load time by **67%**, optimizing Mapbox gameplay with OSM building detection and IndexedDB caching
- Engineered **secure authentication** and automated **Python/AWS S3 asset pipelines**, cutting deployment preparation by **89%** from 3h to 20min

bibbidi-bobbidi-boo! | *Next.js, TypeScript, Gemini APIs, MongoDB Atlas, Auth0, ElevenLabs*

- Shipped an end-to-end **AI platform in 24 hours**, architecting a multimodal pipeline with Gemini API and ElevenLabs to power **vision, virtual try-on, voice interaction, and grounded recommendations**
- Engineered **wardrobe intelligence algorithms** to rank outfits by color, texture, style, and fit while quantifying utilization through a 0–100 Closet Health score
